

One Box - Small

One Box – Small / Empty..... XCPSC02379

One Box – Small / 2 adapters LC/APC + 8 connectors LC/APC XCPSC02394

Description

The OneBox Small is a termination wall box designed for use in residential and small businesses premises. The unit houses two splice trays and allows fibres from external cables to be spliced to pigtails, splitters or directly to drop cables. The unit can accommodate a single splitter and has a dedicated patch panel for up to 4 SC type pigtails or 8 LC type pigtails. Input cables can enter from the top or bottom face of the box and output cables exit from the bottom face. There are four exit ports for customer drop cables, which can be installed into the box without the use of cable ties, using a cable anchoring system. The customer drop cables can be pre-connectorized.

Dimensions (mm): 200 (W) x 52 (depth) x 215 (height)
Weight: 0.85 Kg

Tools & additional products

additional products	Prysmian Part No.

INSTALLATION INSTRUCTION

Description of One Box - Small

Install the box on a wall

Step 1

- Rotate the key lock by 90° anticlockwise.
- Open the cover by pressing against both lip ends of the highlighted clips.

Install the box on a wall

Step 2

- Open the cover as much as possible.
- Rotate the two trays by 90°.

Install the box on a wall

Step 3

- Install the box using the wallplugs and screws supplied with the product.

Install the box on a wall

Step 4

- Use the Oval Rubber Plugs to seal the three wall fixation points of the box.

Install the box on a wall

Step 5

- Close the Cover pushing it up to engage the two highlighted clips.
- Rotate the key lock by 90° clockwise.

Install a Cable / Tube

Step 6

- Check the cable seal diameter range, written on the circular central plug.
- Remove the top part only.

Install a Cable / Tube

Step 7

- Remove only the top part from the box.

Install a Cable / Tube

Step 8

- Break the plug.

Install a Cable / Tube

Step 9

- Check the cable clip diameter range, written on the left bottom corner.
- Break the Aramid Yarns Cap pushing it as shown. Pay attention not to leave plastic connection pieces on the surface. Don't waste the cap.

Install a Cable / Tube

Step 10

- Push the cable/tube into the cable clip.

Install a Cable / Tube

Step 11

- The end of the external sheath is near the end of the cable clip.

Install a Cable / Tube

Step 12

- Move Back aramid yarns as shown, please always keep the yarns in tension.
- Make two turns around central pole with the aramid yarns as in the picture, keep always the yarns in tension.

Install a Cable / Tube

Step 13

- Push the aramid yarn cap in position.
- Cut the exceeding part of aramid yarns.

Install a Cable / Tube

Step 14

Note: All the aramid yarns are directed backward while fibre units proceed straight as per arrow on the cable clip.

Install a Cable / Tube

Step 15

- Fit the cable clip into the box pushing it down to engage the retention teeth.
- Reinstall the top part of the cable Seal.
- Strongly push the seal to close the separation gap.

Install a Network Cable

Step 16

- Install the gas seal unit, if required.

Install a Network Cable

Step 17

- Mark the cable on the top side of the circled cable clip saddle.

Install a Network Cable

Step 18

- Use the Cable Clips as described in the dedicated section. Install the cable clips with the right diameter on the tube and on the cable in circled positions.

Install a Network Cable

Step 19

- Take Network Fibers to the bottom tray, where they will be spliced to pigtails.
- Use thermo-shrinkable or crimp splice protectors in the splice area.
- Store the fiber overlength around the Flexible Central Mandrel.

Install a Network Cable

Step 20

- If Network Cables comes from Top Side, then install cable clips with the right diameter on the tube and on the cable in circled positions.

Install a Network Cable

Step 21

- Route Network Fibers through highlighted passages.
- Install fibers into the bottom tray as described two steps in advance.

Install a Network Cable

[illegible]

- If not supplied install the adapters.
- If not supplied install pigtails routing them to the bottom tray through highlighted passages.

Installing a Customer Cable / Splitter

Step 23

- Use the Cable Clips as described in the dedicated section. Install the cable clips with the right diameter on the Customer Cable in circled positions.

Installing a Customer Cable / Splitter

Step 24

- Route Customer Fibers through highlighted passages.
- Install fibers into the top tray as described in the previous chapter.

Installing a Customer Cable / Splitter

Step 25

- If required install the pre-connectorized Splitter 1x4 LC.

Installing a Customer Cable / Splitter

Step 26

- Install the Splitter Input Connector in correspondence of the Network Fiber Pigtail.
- Store the Splitter Input Overlength as shown.

Installing a Customer Cable / Splitter

Step 27

- Install the Splitter Output Connectors in correspondence of empty adapters or Customer Fiber Pigtails if available.
- Store the Splitter Output Overlength as shown.

Installing a Customer Cable / Splitter

Step 28

- Alternatively, a bare fiber splitter can be installed in the bottom or the top tray.

Installing a Customer Cable / Splitter

Step 29

- If not supplied install pigtails routing them to the top tray through highlighted passages.
- Install the Customer Pigtail Connector in correspondence of the Splitter Output (if required) or Network Pigtails.

Installing a Customer Cable / Splitter

Step 30

- Use thermo-shrinkable or crimp splice protectors in the splice area.
- Store the fiber overlength around the Flexible Central Mandrel.

Storage Area

Step 31

- The storage Area can be used to park fibers which will be used later through a tube outside of the box.
