TV06051

-not to scale-

Cable Application

This loose tube optical drop cable is design for aerial and/or duct applications and is suitable for use under 11 kV power cables. Please refer to our General Installation (Datasheet Ref: CIG059) and Safety & Handling recommendations (Generic Optical cable MSDS - Datasheet Ref: 9980-02-1) before handling.

Cable is suitable for Openreach PIA approval when tested together with tension clamps from PLP Preformed Line Products (item code FODE 5709060R) and fibre locking bollards from OPT Services Ltd (item code T0216).

Cable Design – TC06051

DESIGN & CONSTRUCTION

Optical fibre: Single mode G.657.A1.
Strength member: 3 x 0.32mm brass plated steel wires.
Tube: Thermoplastic material, containing between 1 and 12 single-mode optical fibres and filled with a suitable water tightness compound.
Longitudinal Water Tightness: Water swellable elements (dry

core only). Outer Sheath: HDPE, 2 Ripcords beneath the sheath.

Grooves/stripes: Indicate planes for easy sheath removal

The design above shows 12 fibre, the drop cable only contains 1 fibre.

Cable description

This loose tube optical drop cable is design for aerial and/or duct applications and is suitable for use under 11kV power cables. The cable has a break load of 1800N and a maximum aerial span length of 95M. The table below shows the ice and wind loading for this cable. The cable also has Openreach PIA approval, when using specified clamps as per page 1.

| Layout | | Single central tube | | | | |
|-------------------|---------|-------------------------------------|------------|--|--|--|
